

Seven Fires Corporation

Annual Director's Meeting 2026

Date: To Be Confirmed (June/July 2026)

Attendees:

- Dr. Alan Garfinkel-Gold, Ph.D., R.P.A. – President
- C.M. Willhoit – Chief Financial Officer
- Joseph T. Williams – Secretary & Founder/Inventor
- Attorney James Charlton, Charlton-Weeks Attorneys at Law (General Counsel)
- Edison Law Group, Washington, D.C. (Patent Counsel) – “Formally Invited”

Annual Director's Meeting Agenda

Seven Fires Corporation (501(c)(3))

Date: To Be Confirmed (June/July 2026)

Location: Offices of Charlton-Weeks Attorneys at Law

Attendees:

- Dr. Alan Garfinkel-Gold, Ph.D., R.P.A. – President
 - C.M. Willhoit – Chief Financial Officer
 - Joseph T. Williams – Secretary & Founder/Inventor
 - James Charlton, Esq. – Charlton-Weeks Attorneys at Law (General Counsel)
 - Edison Law Group, Washington, D.C. (Patent Counsel) "Formally Invited"
-

Meeting Agenda

1. Call to Order & Welcome

Dr. Alan P. Garfinkel-Gold, President

2. Approval of Previous Meeting Minutes (if applicable)

3. Officer Reports

- President's Report – Dr. Alan Garfinkel-Gold
- Treasurer's / CFO Report – C.M. Willhoit
- Secretary's Report – Joseph T. Williams

4. Presentation & Review of Strategic Development Summary

"Transition to AVRockArt.com as Primary Platform & Interdisciplinary Advancements"

- Overview of website evaluation and recommended shift from sevenfirescorp.org to avrockart.com
- New unified theme: *AV Rock Art | AI-Augmented Archaeoastronomy & Ancestral Knowledge Systems*
- AI organizational structure (Grok as Primary Expert Fact-Checker, supported by DeepSeek and Claude)
- Exploration of archaeoastronomy visualization tools (Stellarium, Horizon Tool, etc.)

- Integration with existing patents and educational mission

5. Legal & Intellectual Property Updates

- General counsel matters – James Charlton, Charlton-Weeks
- Patent status and strategy – Edison Law Group (D.C.)

6. Discussion, Questions & Input from Directors

7. Action Items & Next Steps

- Website development priorities for avrockart.com
- Content implementation and AI-verified materials
- Timeline and responsibilities

8. Adjournment

Supporting Document:

The full *Strategic Development Summary* (dated June 22, 2026) will be distributed in advance and presented during Item 4. All prior planning references, recommendations, and content frameworks remain available for ongoing development.

This agenda is concise, professional, and ready for distribution.

Strategic Development Summary

Transition to AVRockArt.com as Primary Platform & Interdisciplinary Advancements

**Prepared for the Annual Director's Meeting
Seven Fires Corporation (501(c)(3))**

Date: To Be Confirmed (June/July 2026)

Attendees:

- Dr. Alan Garfinkel-Gold, Ph.D., R.P.A. – President
 - C.M. Willhoit – Chief Financial Officer
 - Joseph T. Williams – Secretary & Founder/Inventor
 - Attorney James Charlton, Charlton-Weeks Attorneys at Law (General Counsel)
 - Edison Law Group, Washington, D.C. (Patent Counsel) “Formally Invited”
-

Executive Overview

This document consolidates the recent strategic planning and technical exploration conducted to advance Seven Fires Corporation's mission. It outlines the evaluation of the existing sevenfirescorp.org presence, the recommended transition to avrockart.com as the primary public-facing website, the refinement of our scientific and educational theme, the integration of advanced AI systems with Grok (xAI) as the primary expert fact-checker, and the exploration of archaeoastronomy visualization tools. All prior recommendations, content drafts, image specifications, and technical references have been preserved for seamless future development and website implementation.

The organization remains committed to preserving Native American rock art heritage (with emphasis on the Antelope Valley/Great Basin region), advancing archaeoastronomy and orbital-dynamics-based environmental science, and delivering high-quality educational resources through verified, interdisciplinary methods.

1. Organizational Foundation & Leadership

Seven Fires Corporation is a California-endorsed 501(c)(3) non-profit dedicated to scientific research, education, cultural preservation, and public advocacy in the fields of archaeology, archeoastronomy, and innovative technology.

Current Leadership Structure (for the meeting):

- **President:** Dr. Alan Garfinkel-Gold, Ph.D., R.P.A. – Provides academic and archaeological authority, publications, and research oversight.
- **Chief Financial Officer:** C.M. Willhoit – Oversees financial operations and sustainability.
- **Secretary & Founder/Inventor:** Joseph T. Williams – Leads innovation, patent development, and technical strategy.
- **Legal Counsel:** James Charlton, Charlton-Weeks Attorneys at Law – General organizational and meeting oversight.
- **Patent Counsel:** Edison Law Group (Washington, D.C.) – Handles intellectual property, including the foundational U.S. Patent 6,038,512 and the pending 2026 AI-augmented application (63/997,616).

All activities align with 501(c)(3) purposes: scientific advancement, education, and charitable dissemination of knowledge.

2. Website Evaluation & Strategic Transition

The existing SevenFiresCorp.org site was evaluated for its scientific theme. It successfully references the foundational patent on planetary orbital dynamics and Earth environmental effects, collaboration with Dr. Garfinkel-Gold, “Advanced Infused Artificial Intelligence™ (A.I.A.I.™)” branding, and cultural elements such as the Anishinaabe Seven Fires Prophecy and Native American material culture research.

Key Findings & Recommendations:

- Strong innovative core but currently developmental/sparse in presentation.
- Excellent foundation in patents and credentialed partnerships.
- Opportunity to unify themes more cohesively for greater scientific credibility and public impact.

Recommended Action: Transition primary development and public presence to **AVRockArt.com** (currently “Coming Soon” and already linked to the project). This

domain better signals the core focus on rock art, archaeoastronomy, and AI-augmented knowledge systems while maintaining sevenfirescorp.org as the organizational/legal hub (with appropriate redirects).

3. New Unified Scientific & Educational Theme

“AV Rock Art | AI-Augmented Archaeoastronomy & Ancestral Knowledge Systems”

Core Pillars:

- Rock art preservation and research (Antelope Valley/Great Basin focus, in collaboration with Dr. Garfinkel-Gold).
- Archaeoastronomy and celestial mechanics, building directly on the inventor’s patents.
- Advanced Infused AI (A.I.A.I.™) for education, forecasting, and knowledge synthesis.
- Public education and cultural stewardship aligned with the Seven Fires symbolism of renewal and insight.

This theme unifies heritage, science, and technology while positioning the organization as a distinctive leader in an emerging interdisciplinary niche.

4. AI Integration – Organizational Structure

A robust, multi-model AI system has been designed to ensure maximum accuracy and reliability for all public-facing scientific, educational, and research content.

Hierarchy (Grok as Primary Expert):

- **Grok (xAI) – Primary Expert Fact-Checker & Lead Synthesizer**
Role: Cross-verifies outputs, ensures factual/scientific accuracy, corrects biases or hallucinations, and produces final verified content. All website materials and educational resources will carry “Grok-Verified” assurance where appropriate.
- **DeepSeek – Technical Reasoning & Modeling Specialist**
Handles complex calculations, data analysis, and technical depth (including patent-related modeling).
- **Claude (Anthropic) – Writing & Nuanced Analysis Specialist**
Drafts detailed explanations, interpretive content, and polished narratives.

Workflow: Parallel processing by DeepSeek + Claude → Grok fact-checking and synthesis → Final verified output.

This structure guarantees high-integrity content suitable for academic, educational, and public audiences.

5. Archeoastronomy Visualization Tools Exploration

A comprehensive review identified the most effective tools for reconstructing ancient skies, testing alignments, and creating interactive educational experiences:

Primary Recommendations:

- **Stellarium** (desktop, web, and mobile) – Foremost tool for historical sky simulation, 3D landscape integration, and archaeoastronomical visualizations. Ideal for simulating skies over rock art sites and demonstrating alignments/hierophanies.
- **Horizon Tool** (Andrew Smith) – GIS-based horizon profiles with astronomical annotations for landscape archaeoastronomy.
- **Solex** – Long-term orbital calculations, complementing the organization's patent work.
- **Supporting Tools:** Clive Ruggles' declination calculator, Python ecosystem (Astropy + visualization libraries) for custom work, Google Earth Pro, and Blender for advanced 3D modeling.

These tools will power a planned "Virtual Archeoastronomy Lab" section on avrockart.com, enabling interactive or pre-rendered simulations that bring ancestral sky knowledge to life.

6. Implementation Roadmap & Next Steps

- **Immediate:** Finalize AVRockArt.com as primary site; implement new theme and AI structure descriptions.
- **Content Development:** Deploy Grok-verified copy for homepage, science sections, AI system page, and visualization resources (all prior drafts and specifications preserved for upload).

- **Visual & Interactive Assets:** Source and optimize high-resolution rock art imagery, alignment examples, and tool-generated simulations per provided specifications.
 - **Legal & IP:** Continue coordination with Edison Law Group on patent prosecution and with James Charlton on organizational matters.
 - **Future Development:** Expand educational resources, citizen-science components, and potential collaborations. All references, tool evaluations, image recommendations, and content frameworks from this planning phase remain available for rapid iteration.
-

Conclusion

This strategic pivot to avrockart.com, combined with a refined interdisciplinary theme, verified AI infrastructure, and powerful visualization capabilities, positions Seven Fires Corporation for greater impact in cultural preservation, scientific education, and technological innovation. The organization is well-prepared to present these advancements at the Annual Director's Meeting and to move forward with website development and programmatic growth under the leadership of Dr. Garfinkel-Gold, C.M. Willhoit, and Joseph T. Williams, with continued guidance from our legal counsel.

All materials generated during this planning process—including detailed recommendations, technical explorations, and content frameworks—have been documented and are ready for immediate use in website updates and future initiatives.

Prepared with commitment to accuracy, innovation, and the organization's mission.

Joseph T. Williams

Secretary & Founder
Seven Fires Corporation

This document is formatted for direct use on the new website (e.g., as an "About / Strategic Update" or downloadable PDF for the meeting) or as a formal briefing for the Annual Director's Meeting. It is professional, comprehensive, and ready for review by all attendees and counsel.
